

BC FORESTRY REVITALIZATION TRUST

CONTRACTOR INFORMATION REQUIREMENT CHECKLIST

Any contractor who has lost some or all of their replaceable contractual rights as a result of timber reallocations stemming from the Forestry Revitalization Act (FRA) must provide certain base information in order for the BC Forestry Revitalization Trust (BCFRT) to consider a claim.

The information required by the BCFRT includes the following:

1. If a Forestry Revitalization Proposal (FRP) prepared by the Licensee for whom the replaceable contractor worked has been implemented, a copy of the final, implemented FRP.

Note: If no FRP has been prepared by the Licensee by the deadline stipulated in the Section 3 order under the FRA to that licensee, then proportional reduction of all replaceable contracts relating to each affected license will occur, and contractors can apply for compensation after that deadline.

2. A copy of the replaceable contract(s) being affected by the FRA.
3. The date on which the contractor was materially affected by a volume reallocation resulting from the FRA. This date is designated as the Date of Impact, and will generally be stipulated in the FRP.
4. The total contract billings made under the contract for the portion of the calendar year prior to the Date of Impact and for the two prior calendar years.
5. For volume-based contracts, the total volume produced under the contract for the portion of the calendar year prior to the Date of Impact and for the two prior calendar years.
6. The volume of work available to the contractor under the replaceable contract immediately prior to the Date of Impact. This will generally be stipulated in the contract.
7. The amount the contract has been reduced expressed as the unit of measure used in the contract.
8. Any replaceable sub-contracts that the contractor is party to and that are related to the impacted replaceable contract.
9. Detailed information relating to employees of the contractor, if any, which must be severed as a result of the FRA timber reallocation.
10. A list of equipment, if any, that has been made redundant due to a reduction of work caused by the FRA.
11. Any other information the contractor believes is relevant to judging the value of the contract .
